LEGO LIFE

The image shows a circular inset representing the LEGO Life app interface. It includes a QR code, a step-by-step assembly guide with numbered steps (1 and 2), and the LEGO LIFE logo at the bottom.

Everyone loves treehouses ...

What is it about a treehouse that is so universally appealing? Even if you didn't have one as a child yourself, you probably wanted one. As a space outside of the family home, treehouses tap into that innate childhood desire to create a little secret space for oneself; from a simple tent or blanket fort that you make yourself, to an elaborate outside playhouse that a parent may have helped you create.

Treehouses represent fun, creativity and imagination all in one secret space built just for you (and maybe a few of your friends)!

This is why we are so happy to present the LEGO® Ideas Treehouse. So now, even if you didn't have one yourself when you were a kid, you can build the dream that you will never grow out of.

Plants from Plants

During 2018, the LEGO Group began making botanical elements, including trees, leaves and bushes, from a plant-based polyethylene plastic, produced using sustainably sourced sugarcane.

These elements represent the first milestone in the LEGO Group's ambitious commitment to making products using sustainable materials by 2030.

The LEGO® Ideas Treehouse uses over 180 botanical elements in the foliage of the tree, making this set the largest collection of LEGO elements made from sustainable sources to date.

The LEGO Ideas Treehouse celebrates the endless creativity unique to the LEGO system-in-play and represents both the beauty of the natural world, and the LEGO Group's sustainable materials challenge.

www.LEGO.com/plantsfromplants

Meet the maker ...

Kevin Feeser, Fan Designer

The person behind the original Treehouse design is Kevin Feeser, a hairdresser and huge LEGO® fan from France. Not just creative by profession, Kevin is an avid lover of design, architecture and nature, all of which merges together in his awesome treehouse creation. Here is more from the man himself ...

“I’m passionate about nature, wildlife and wooden constructions. So the idea for the model emerged during an unusual weekend with friends in Robinson Crusoe-style treehouses. The tree trunk was the most difficult part of the model to get right, because it had to be robust enough to support three shacks while using the least number of elements possible! Also, the shacks were a challenge ... there had to be a lot of details, and bridges and stairs between each hut, as well as an overall round shape.

It took about two months (about 300 hours) to complete the model. I remodeled the whole project six times (trunk, shacks, roofs, leaves, etc.) in designing my final creation. When I saw that I had reached the magic 10,000 supporters in less than 4 months, I was very proud and really happy! I always believed in my creation but didn’t expect it to reach the 10,000 supporters so quickly.”

To create a successful LEGO Ideas product idea:

“Be creative - check out what’s out there ... and then do something entirely different.

Be inspired - put together a portfolio of real things (photos, drawings, etc.).

Be prepared - source the right elements, visit the LEGO Pick-a-Brick website, etc.

Finally, carefully read the LEGO Ideas rules. From my own experience, I misread the rules and I had to remodel my whole design to use less than 3,000 LEGO elements!”

Meet the LEGO® Designer

César Carvalhosa Soares

“I loved treehouses as a kid, and still dream of having one in my backyard one day. In fact, when I applied to become a designer at the LEGO Group, my portfolio contained a couple of treehouse builds. So ever since Kevin’s original treehouse submission got the required 10,000 supporters, I was rooting for it to be picked and made as an official set. Having the opportunity to work on this project was really special.

This project was different to my previous work, which was mainly on LEGO® *Star Wars*™, because the build is so organic and there was room for creative freedom.

My role was to pick up the original submission and adapt and tweak it to match the high quality standards of the LEGO brand. Things like the stability of the model, the overall aesthetics, the build flow and playability of the model had to be considered.

The most challenging part for me was making the roofs removable so that the cabins could be accessed. The solution was to create the entire last third of the tree as one removable part.

Kevin came to Billund, so we had the chance to collaborate closely and discuss some points regarding the treehouse design. This really helped create a set that would meet both his expectations but also the LEGO brand standards.

What I love about the treehouse is the bit of landscape with the little stream, the way that all the cabins have different details and also the fact that there is no “back side” to the model. There is almost the same amount of detail and intricacy from every angle that you look at. But the thing that I’m really proud of is the fact that you can swap the colors of the leaves to match different seasons with pieces from just one set. I suggested this option so I’m super happy that we could make it happen.”

Tout le monde aime les cabanes dans les arbres...

Qu'est-ce qui fait qu'une cabane dans un arbre a un tel attrait universel ? Même si vous n'en avez jamais eu étant enfant, vous avez probablement rêvé d'en avoir une. Parce qu'il s'agit d'un espace en dehors de la maison familiale, la cabane dans l'arbre fait appel au désir commun des enfants de se créer un petit espace secret. Ce peut être une simple tente ou un fort conçu avec des draps, ou encore une maisonnette construite dans la cour avec l'aide d'un parent.

Une cabane dans un arbre inspire le jeu, la créativité et l'imagination, tout cela dans un seul espace secret construit juste pour soi (et quelques amis, peut-être) !

C'est pourquoi nous sommes si heureux de présenter la cabane dans l'arbre LEGO® Ideas. Alors, même si vous n'avez pas eu la chance d'en avoir une lorsque vous étiez enfant, vous pouvez maintenant construire la cabane de rêve à laquelle vous pensez encore.

Des plantes fabriquées avec des plantes

En 2018, le Groupe LEGO a commencé à concevoir des éléments botaniques, dont des arbres, des feuilles et des buissons, à partir d'un plastique polyéthylène à base de plantes, un produit de la canne à sucre provenant de sources durables.

Ces éléments constituent la première étape dans l'engagement ambitieux du Groupe LEGO à fabriquer ses produits à partir de matériaux durables d'ici 2030.

La cabane dans l'arbre LEGO® Ideas utilise plus de 180 éléments botaniques dans le feuillage de l'arbre, faisant de cet ensemble la plus grande collection d'éléments LEGO issus de sources durables à ce jour.

La cabane dans l'arbre LEGO Ideas célèbre les possibilités créatives infinies qui sont uniques au système de jeu LEGO, et représente à la fois la beauté de la nature et le défi du Groupe LEGO relativement aux matériaux durables.

www.LEGO.com/plantsfromplants

Rencontre avec le créateur du modèle...

Kevin Feeser, concepteur amateur

La personne derrière le concept initial de la cabane dans l'arbre est Kevin Feeser, coiffeur français et grand amateur de LEGO®. Pas seulement créateur de profession, Kevin est un passionné de design, d'architecture et de nature, des centres d'intérêt qu'il a su combiner en créant cette fantastique cabane dans l'arbre. Apprenez-en un peu plus sur lui...

« Je suis passionné de nature, de faune et de constructions en bois. J'ai d'ailleurs eu l'idée du modèle au cours d'une escapade inusitée avec des amis dans des cabanes dans les arbres rappelant celle de Robinson Crusoé. Le tronc de l'arbre est la partie que j'ai trouvée la plus difficile à concevoir dans le modèle, parce qu'il devait être assez robuste pour soutenir trois bâtiments tout en utilisant le moins d'éléments possible ! Les bâtiments en soi ont aussi comporté leur lot de défis... il devait y avoir beaucoup de détails, des passerelles et des escaliers entre chacun d'entre eux, et il fallait pouvoir leur donner une forme arrondie.

Il a fallu environ deux mois (plus ou moins 300 heures) pour terminer le modèle. J'ai modifié l'ensemble du projet six fois (tronc, bâtiments, toits, feuilles, etc.) avant d'en arriver à la version définitive. Quand j'ai vu que j'avais atteint le nombre magique de 10 000 votes en moins de 4 mois, j'étais vraiment fier et très heureux ! J'ai toujours cru en ma création, mais je ne m'attendais pas à atteindre les 10 000 votes aussi rapidement. »

Pour créer une idée gagnante de produit LEGO Ideas :

« Soyez créatif : n'hésitez pas à explorer... et à proposer quelque chose de vraiment nouveau. Laissez-vous inspirer : assemblez un portfolio (photos, dessins, etc.). Pensez à tout : recherchez les éléments dont vous avez besoin, visitez le site Pick A Brick de LEGO, etc.

Enfin, lisez attentivement les règles de LEGO Ideas. Pour ma part, j'ai mal lu les règles et j'ai dû modifier ma conception entière pour utiliser moins de 3 000 éléments LEGO ! »

Rencontre avec le concepteur LEGO®

César Carvalhosa Soares

« J'adorais les cabanes dans les arbres étant enfant, et je rêve encore d'en construire une dans ma cour. En fait, lorsque j'ai postulé pour devenir concepteur pour le Groupe LEGO, mon portfolio contenait quelques constructions de cabanes dans les arbres. C'est pourquoi dès que l'idée de cabane dans l'arbre de Kevin a reçu les 10 000 votes nécessaires, j'ai moi aussi donné mon appui pour en faire un ensemble officiel. L'occasion de travailler sur ce projet était vraiment fantastique.

Ce projet était différent de mon travail précédent, axé principalement sur LEGO® Star Wars™, parce que la construction était plus organique et qu'il y avait place pour la liberté de création.

Mon rôle consistait à reprendre le modèle initial pour l'adapter et le modifier un peu de manière à le faire correspondre aux normes de qualité de la marque LEGO. Des points comme la stabilité du modèle, son esthétique générale, le flux de construction et la jouabilité devaient être examinés.

La partie la plus difficile, selon moi, a été de rendre les toits amovibles afin de pouvoir accéder à l'intérieur de chaque bâtiment. La solution a été de concevoir le tiers supérieur de l'arbre comme un élément amovible.

Kevin est venu à Billund, donc nous avons eu la chance de collaborer étroitement et de discuter de certains aspects de la conception de la cabane dans l'arbre. Cela a vraiment contribué à la création d'un ensemble qui répond à la fois à ses attentes, mais aussi aux normes de la marque LEGO.

Ce que je préfère de la cabane dans l'arbre, c'est l'ajout d'un paysage avec un petit ruisseau, les différences dans les détails de chaque bâtiment, et le fait que le modèle ne présente aucun côté "arrière". Peu importe l'angle avec lequel vous le regardez, vous remarquerez autant de détails complexes. Mais ce dont je suis le plus fier est la possibilité de changer les couleurs des feuilles pour les faire correspondre aux différentes saisons, en utilisant les pièces d'un seul ensemble. Cette option était mon idée; je suis donc particulièrement heureux que nous ayons pu la mettre en œuvre. »

A todos nos encantan las casas en los árboles...

¿Qué tiene una casa en un árbol que resulta tan universalmente atractivo? Incluso si no tuviste ninguna de niño, de seguro querías una. Al ser un espacio fuera del hogar familiar, las casas en los árboles dan respuesta a ese innato deseo infantil de crear un pequeño espacio secreto para uno mismo: ¿recuerdas aquella sencilla tienda de campaña, el fuerte de mantas que tú mismo construiste o esa sofisticada casa de juegos al aire libre que quizá tus padres te ayudaron a crear?

Una casa en un árbol representa diversión, creatividad e imaginación, todo dentro de un espacio secreto construido sólo para ti (y quizá unos pocos amigos).

Es por eso que nos alegramos tanto de presentar la Casa del Árbol LEGO® Ideas. Ahora, incluso si no tuviste una cuando eras niño, puedes construir ese sueño para el que nunca serás demasiado mayor.

Plantas con Plantas

En 2018, The LEGO Group empezó a fabricar elementos botánicos (como árboles, hojas y arbustos) a partir de un plástico de polietileno de origen vegetal producido con caña de azúcar procedente de fuentes sustentables.

Tales elementos representan el primer paso del ambicioso compromiso de The LEGO Group con la fabricación de productos empleando materiales sustentables antes de 2030.

La Casa del Árbol LEGO® Ideas incluye más de 180 elementos botánicos para reflejar el follaje del árbol, lo que hace de este el set con la mayor colección de elementos LEGO fabricados a partir de fuentes sustentables hasta la fecha.

Este set LEGO Ideas celebra la infinita creatividad que caracteriza al sistema LEGO en acción y simboliza tanto la belleza del mundo natural como el desafío aceptado por The LEGO Group en el campo de los materiales sustentables.

www.LEGO.com/plantsfromplants

Conoce al creador...

Kevin Feeser, fan diseñador

La persona responsable del diseño original de la Casa del Árbol es Kevin Feeser, un francés dedicado a la peluquería y un enorme fan de LEGO®. Creativo no sólo de oficio, Kevin es un ávido amante del diseño, la arquitectura y la naturaleza, todo lo cual se funde en la extraordinaria Casa del Árbol que creó. A continuación, un poco más sobre él, contado por él mismo...

“La naturaleza, la vida salvaje y las estructuras de madera son algunas de mis pasiones. La idea para el modelo surgió durante un increíble fin de semana que pasé con unos amigos en unas casas instaladas en árboles, al estilo de Robinson Crusoe. El tronco del árbol fue la parte del modelo que más trabajo me costó lograr, porque tenía que ser lo suficientemente robusto como para soportar tres chozas y usar el menor número de elementos posible. Las chozas también fueron un desafío: quería que tuvieran muchos detalles, que hubiera puentes y escaleras entre ellas, y que su forma fuera más o menos redonda.

Me llevó unos dos meses (alrededor de 300 horas) completar el modelo. Remodelé el proyecto completo seis veces (tronco, chozas, techos, hojas, etc.) durante el diseño de la creación final. ¡Cuando descubrí que había alcanzado los mágicos 10.000 votos en menos de 4 meses, me sentí muy orgulloso y realmente feliz! Siempre creí en mi creación, pero no esperaba que llegara tan rápido a los 10.000 apoyos”.

Para crear una idea que pueda convertirse en un producto LEGO Ideas:
“Sé creativo: echa un vistazo a lo que hay allá afuera, y luego haz algo completamente diferente. Inspírate: compón una carpeta de cosas reales (fotos, dibujos, etc.).
Prepárate: busca los elementos que necesitas, visita el sitio web de LEGO Pick-a-Brick, etc.

Por último, lee atentamente las reglas de LEGO Ideas. Lo digo por experiencia: imalinterpreté las reglas y tuve que remodelar todo el diseño para usar menos de 3000 elementos LEGO!”.

Conoce al diseñador de LEGO®

César Carvalhosa Soares

“Cuando era pequeño, me encantaban las casas en los árboles; todavía sueño con tener una en mi jardín algún día. De hecho, cuando solicité el puesto de diseñador en The LEGO Group, mi currículum incluía un par de modelos de casas en árboles. Así que, desde que la propuesta original de la Casa del Árbol de Kevin obtuvo los 10.000 votos necesarios, apoyé la idea de elegirla y convertirla en un set oficial. Tener la oportunidad de trabajar en este proyecto fue muy especial.

Era un proyecto distinto a lo que había hecho hasta entonces, que era principalmente para LEGO® Star Wars™, porque se trataba de un modelo muy orgánico y había espacio para la libertad creativa.

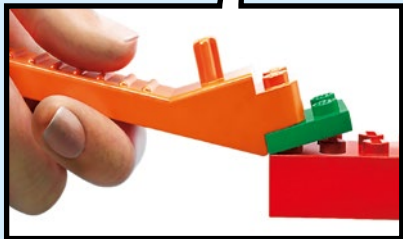

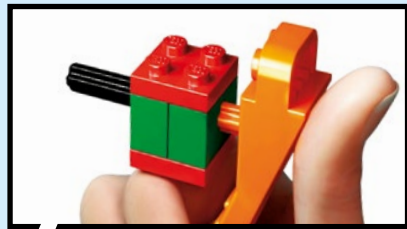

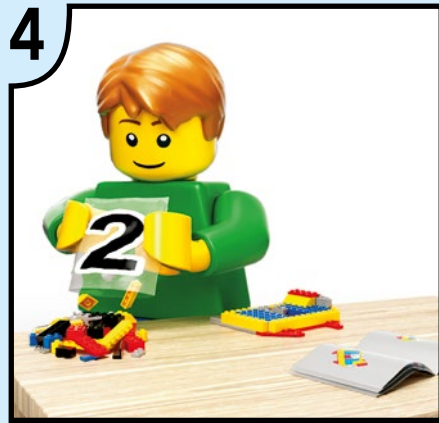

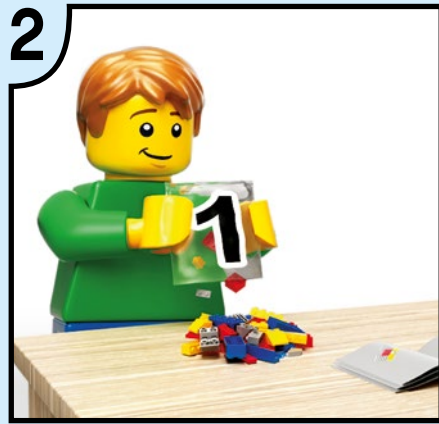

Mi función consistió en partir de la propuesta original, adaptarla y modificarla para que se ajustara a los rigurosos patrones de calidad de la marca LEGO. Tuve que contemplar aspectos como la estabilidad del modelo, la estética general, el flujo de construcción y las posibilidades de juego.

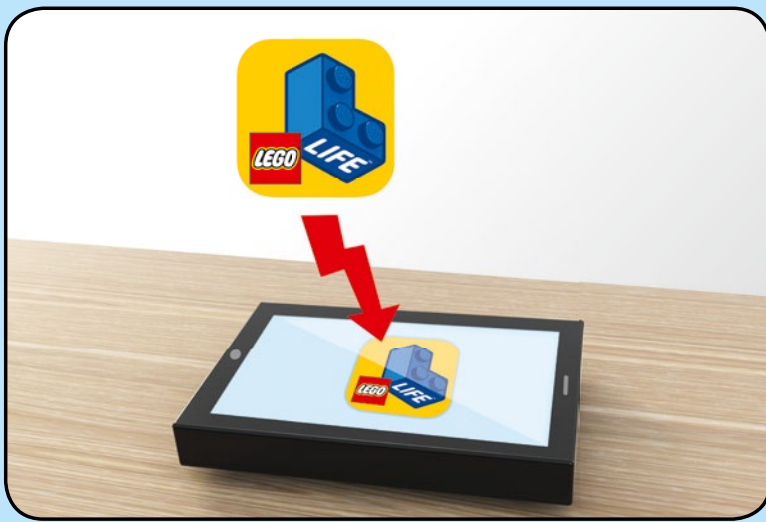

Para mí, lo más difícil fue lograr que los techos se pudieran quitar para acceder a las cabañas. La solución fue crear todo el último tercio del árbol como una sección removible.

Kevin nos visitó en Billund, así que nos fue posible colaborar

estrechamente y debatir algunos detalles sobre el diseño de la Casa del Árbol. Aquello fue de gran ayuda, porque contribuyó a garantizar que el set cumpliera tanto sus expectativas como los estándares de la marca LEGO.

Lo que más me gusta de la Casa del Árbol es el pequeño paisaje con el arroyuelo, el hecho de que todas las cabañas tengan detalles diferentes y también que sea un modelo sin ‘parte trasera’. Independientemente del ángulo desde el que se mire, casi no se aprecian cambios en el nivel de detalle y el grado de complejidad. Pero lo que realmente me enorgullece es que se puedan cambiar los colores de las hojas para que se correspondan con las estaciones usando piezas de un solo set. Fui yo quien sugirió esa opción, así que estoy muy contento de que hayamos podido hacerla realidad”.
